

KEY FEATURES

- Secure and large file sharing from all devices and browsers
- Removal of hidden, sensitive content before a file is shared online
- Shared groups enhance collaboration and communication on files
- In-document commenting tagged to position
- Comparison of document versions from any desktop or mobile device
- Customizable workspaces and custom URL
- Desktop Sync App for Windows and MacOS
- Workshare Mobile app for iOS and Android
- Granular folder permission settings (including expiration date)
- Group template policy control and enforcement
- ECM and DMS integrations
- User and account management and reporting
- Device management and control – provision and deprovision authorized devices
- Centralized data management
- Customer data center locations – Hybrid (option)
- LDAP/Active Directory integration and single sign on (option)

Share ideas, never miss a conversation, and ensure everyone is always up to date. Workshare Connect is a secure file sharing and collaboration application that enables users to work on and evolve high-value documents with anyone, anywhere.

Workshare's unique commenting and comparison features help users understand and communicate changes more rapidly and accurately during the review process.

IT groups can ensure data governance and mitigate risk of data leaks by exerting full control over how documents are shared and who accesses them. They can also maintain control over where corporate data is located, either on-premise or in the cloud, and extend the reach and ROI of Enterprise Content Management (ECM) and Document Management Systems (DMS).

BUSINESS OPPORTUNITY

Achieve more rapid and efficient collaboration, while working on high-value business documents. Connect provides secure online workspaces that allow users to access, review, and share content with complete version control, all in one place, making collaboration simple.

RISK MITIGATION

Full IT control over user access and file sharing. Unique data-leak-prevention policies, such as hidden sensitive data removal across all channels of communication, prevents accidental exposure of sensitive information. Additional data control features allow complete governance over where data is stored, including a hybrid option with on-premise data.

USER ENGAGEMENT

Workshare Connect makes it easy for users to access and share their files, anytime and anywhere, inside or outside the organization, across all devices. As files are being worked on and reviewed, automatic notifications of new comments and updates to files keep everyone in the loop.

OPERATIONAL EFFICIENCIES

Users are more productive, even when out of the office, and document reviews are more efficient. Integration and syncing with existing DMS or ECM systems allows IT groups to increase the ROI of IT investments while extending them to include new collaborative opportunities.

SYSTEM REQUIREMENTS

BROWSER SUPPORT:

- Mozilla Firefox version 4 and newer
- Google Chrome version 10 and newer
- Apple Safari version 4 and higher
- Internet Explorer 9 and newer
- Opera version 10 and higher

SUPPORTED MOBILE VIEWS:

- Any browser enabled device

DESKTOP APPS - MAC:

- 10.6 (Snow Leopard)
- 10.7 (Lion)
- 10.8 (Mountain Lion)

DESKTOP APPS - WINDOWS:

- Vista
- 7
- 8

MOBILE APPS:

- The certified environments for Workshare Mobile App are iPad and iPhone running iOS 5 and above and Android tablet, v.2.3.3 and above.

USER AND DATA CONTROL OPTIONS

User Control satisfies the need most organizations have to control who has access, what devices they can use, and to enforce policy over how they share business documents, governed by IT. User Control also includes user and account management and policy-driven metadata removal to eliminate risks associated with inadvertently sharing hidden data within documents.

Data control includes deployment options in the cloud that let IT groups decide which specific country their data is stored in. With the Hybrid add-on, documents can be stored in the organization's own data center. Data Control also lets companies externalize and mobilize documents held in their ECM or DMS, securely and simply.
